

BATTERIES
Where the grid is weak
or
not exists.

Drawing: Power support from the grid to charge vehicles

Boat charging (fast)

Multiple Charging poles + 150kW/300kW Fast Charger
Solves the issue of Grid limitations

→ Peak shaving / virtual grid extension with battery system

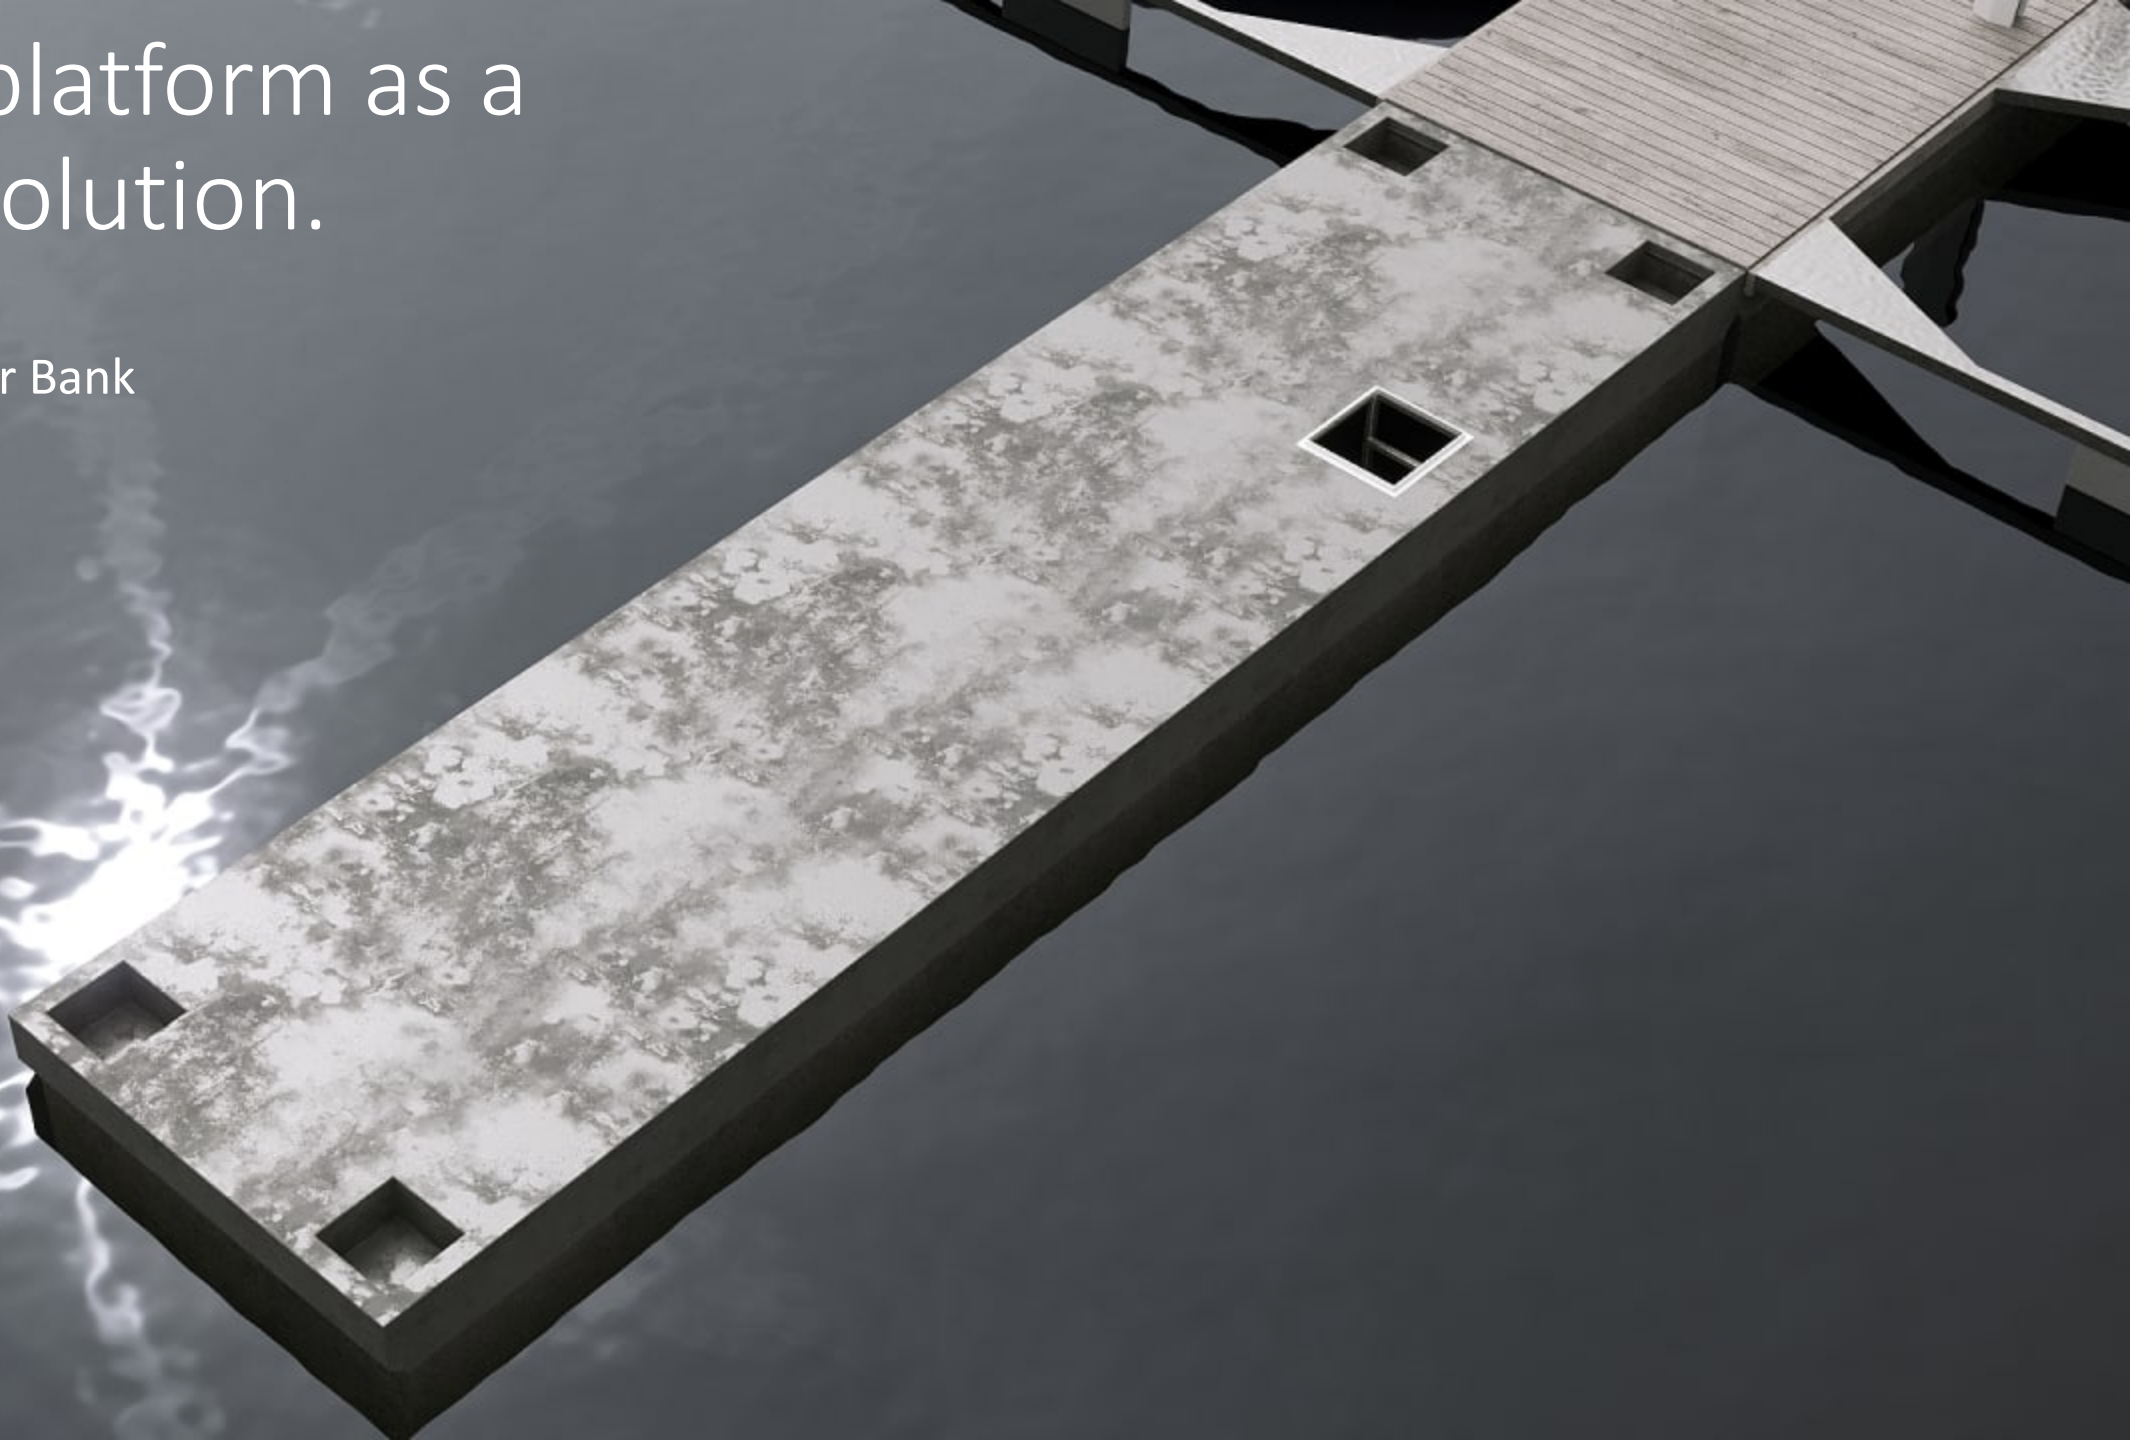

Battery container
10ft / 20ft for
peakshaving

3x (2x22kW max.) Charging pole

1x (2x150kW or 1x300kW) hyper charger

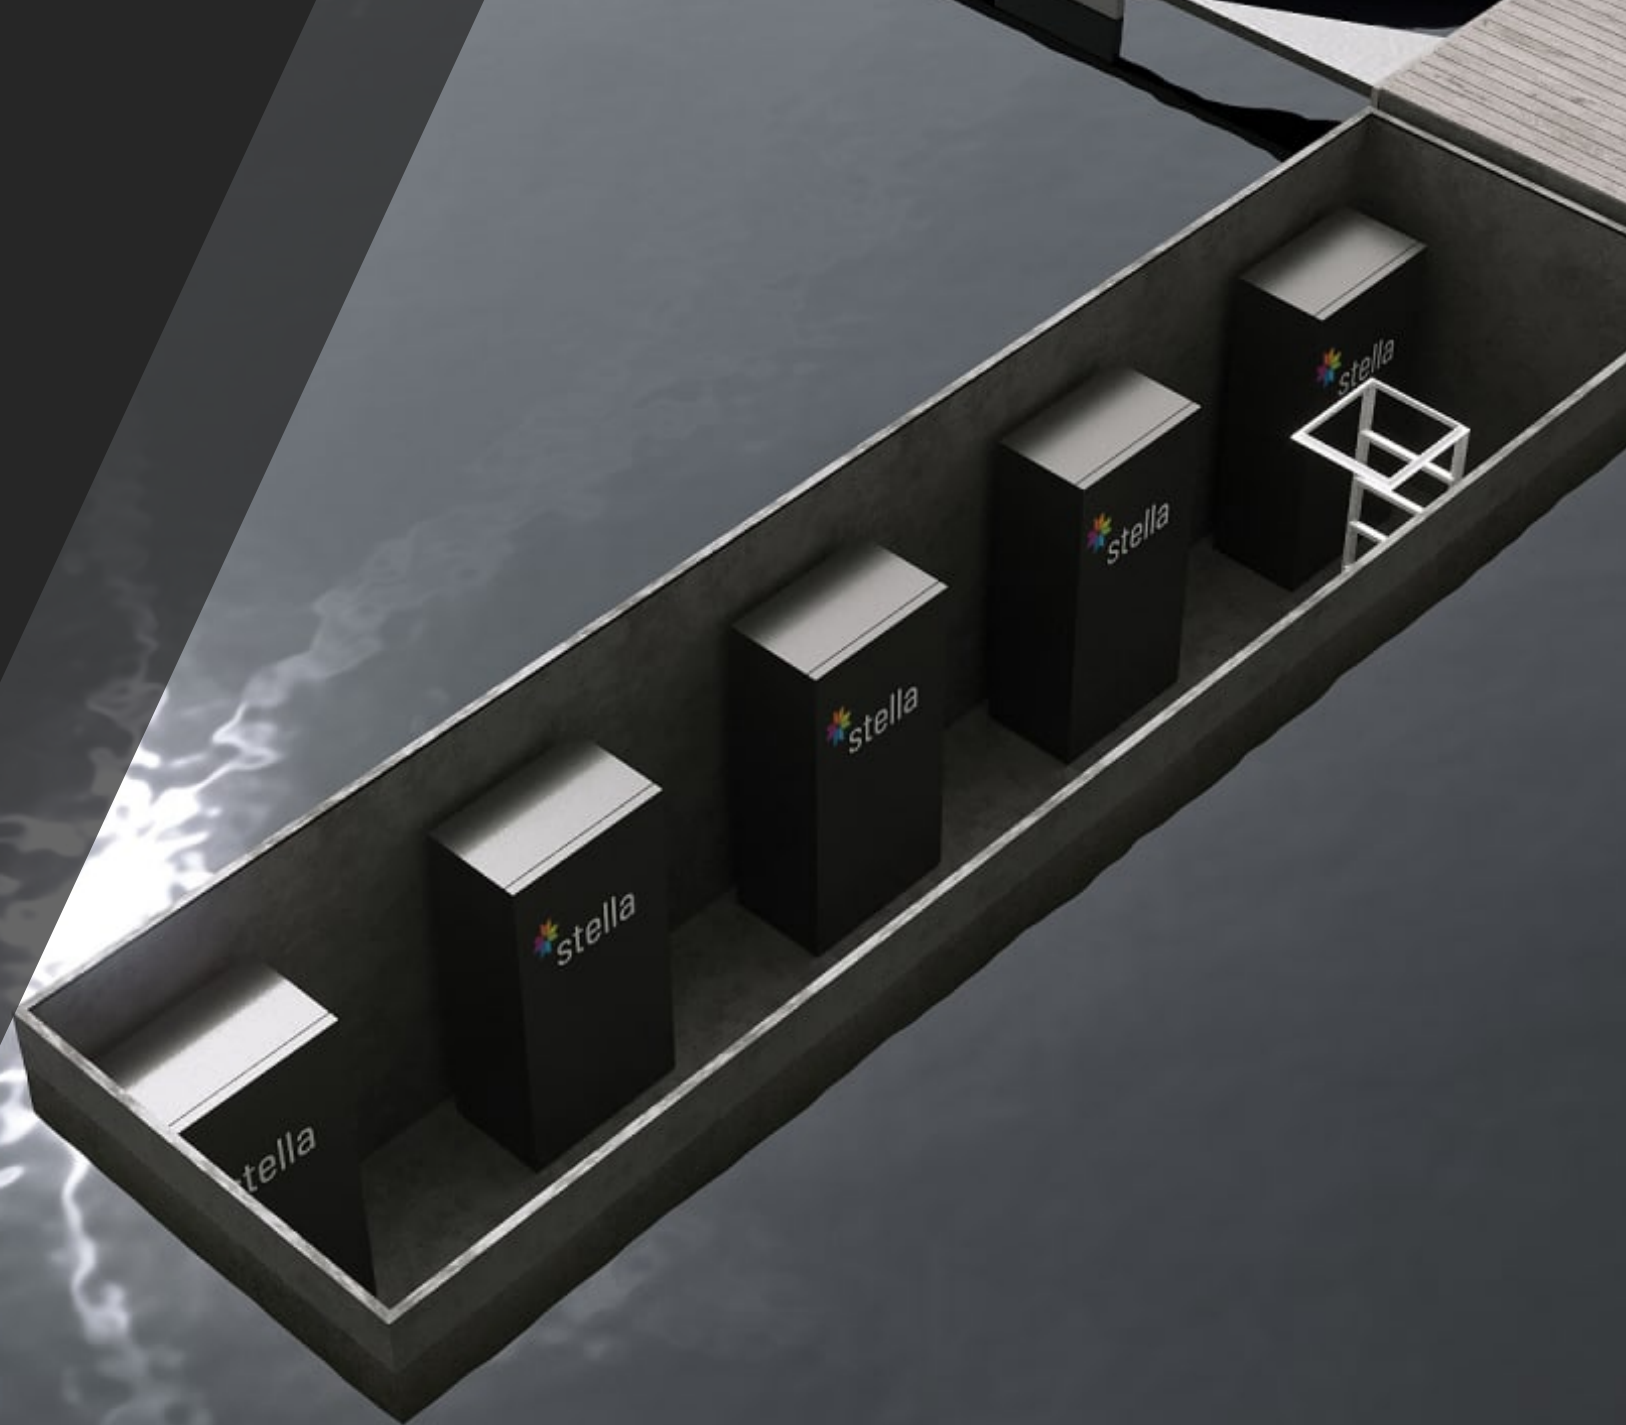

Use the platform as a storage solution.

- Floating Power Bank

Scalable, Modular System

- Can be increased based on changing demands
- Save allot of space
- Financing gets easier
- Fire & Safty solved

safe, reliable and sustainable
energy storage solutions

Thank You!
